Education

Georgia Institute of Technology - Atlanta, GA

B.S. Computer Science & Chinese Minor

- **Honors:** Magna Cum Laude
- **Relevant Coursework:** Machine Learning, Agile Methods, Combinatorics, Natural Language Processing

Shanghai Jiaotong University - Shanghai, China

Chinese Language Immersion Program, Short Course

Skills

- Expertise in various Data Science & ML tools, including SciPy, PyTorch, JAX, NumPy, R, SQL, and Pandas
- More than 10 years experience in Python, Java, C++, and JavaScript
- Proficiency in cloud computing platforms including AWS, Azure, GCP, and Databricks.
- Background in both traditional statistical analysis and neural network based approaches like Transformers and CNNs

Experience

AE Studio, Los Angeles, CA

Senior Data Scientist, 2025 - Present

- Lead team of three in collaboration with senior Anthropic researchers to develop pretraining interventions for AI alignment.
- Produced research on methods for the reduction of CBRN risks, gaining acceptance as an ICML spotlight publication.

S&P Global, Manhattan, NY

Senior Data Scientist, 2024 - 2025

- Directly enabled 20% improvement in accuracy of question-answering systems, enabling automation of core finance tasks.
- Invented new prompt scaffolding techniques utilizing reflection & chain-of-thought, increasing reliability of LLM outputs.

Georgia Tech PAIR Robotics Lab, Atlanta, GA

SWE Volunteer, 2024 - 2025

- Translated early experimental code from ML & robotics researchers into production-ready APIs for use by other research teams.

AGCO Corporation, Atlanta, GA

AI Strategy Lead, 2023 - 2024

- Enabled 50% reduction in time-to-resolution for customer issues via LLM-powered RAG system over 15 million documents.
- Led a team of eight to build custom industry-leading Generative AI powered chatbots for customer support.

Senior Data Scientist, 2021 - 2023

- Simplified 5 regional forecasting efforts into a one global industry demand forecast using custom time series forecasting models.
- Enabled 10x improvement in efficiency of internal audit department by automating identification of suspicious transactions.
- Led a team of eight to build custom industry-leading Generative AI powered chatbots for customer support.

Publications
